

MEMBER OF THE LÄPPLE GROUP

THE FOLLOWING CUSTOMER INFORMATION IS REQUIRED IN ORDER TO PRE-PROGRAM WPM SENSORS AND THE DATA PART AS A UNIT:

•	Name of tool with Position (OT /UT):								
•	Tool number:								
•	Number of sensors per data part:								
•	Pressure limit values for the individual sensors								
	Working filling pressure:								
	Limit value warning (yellow range Start): enter in table below								
	Limit value STOP (red range Start): enter in table below								

SENSOR

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

- Factory setting: Sending interval = 1 sec.
 Other transmission intervals between 0.1 and 10 sec are possible upon request.
 (please note battery life)
- Factory setting: Temperature limit value = 50°C

Note:

In order to have a pictorial file for the data part and to assign the sensors within the tool, a drawing / design sketch (PDF / JPG) with the mounting location of the spring is necessary / required.

The mounting position of the sensors are stored in X/Y-coordinates in the data part.
