

# WIRELESS PRESSURE MONITORING NOW ALSO AVAILABLE AS A PRECONFIGURED STARTER-KIT

Our **Wireless Pressure Monitoring (WPM)** system monitors the pressure and temperature of your FIBRO gas springs when they are installed. Sensors within the tool collect the data and transmit it wirelessly. A specially developed software analyzes this data and initiates appropriate actions, making your production even more efficient and allowing you to benefit from preventive maintenance.

We now offer this as a **preconfigured starter kit**. You'll receive all the components from us preinstalled in one package, allowing you to start monitoring your gas springs directly without any IT support of your own.

# ADVANTAGES:

- Easy integration, possible without IT support – Plug & Play!
- Delivered with two sensors for monitoring two tools and a five-user license
- Local monitoring via Bluetooth – completely cable-free
- For monitoring only or with integration to the press (via MQTT signal)
- Increased productivity & quality

# COMPONENTS:

- 1 2x Sensors (2480.00.91.10.01), Measurement coupling G $\frac{1}{8}$  (2480.00.24.01), Measurement coupling G $\frac{1}{4}$  (2480.00.24.02)
- 2 Repeater (2480.00.91.43)
- 3 Router (2480.00.91.45)
- 4 Industrial PC (Linux) (2480.00.91.41) with installed cloud software and 5-user license (2480.00.91.53.005)
- 5 Storage case (2480.00.91.25.01)
