THE CLEVER OPTION **PILLAR CAM**

available
Q 2.23

STANDARD PORTFOLIO FOR A WIDE RANGE OF APPLICATIONS

STEADILY INCREASING RATIONALIZATION, RISING COMPLEXITY AND SHORTER PROCESS TIMES ARE EVER-PRESENT CHALLENGES IN A MODERN TOOL SHOP PROCESS. THESE DEMAND CLEVER SOLUTIONS WHICH ARE FLEXIBEL DESPITE STANDARDIZATION.

Our new pillar cam is an attractive alternative compared to self made solutions, especially where the installation space within the tool is limited. This allows you to streamline your processes and design them effectively - and all this in usual quality and availability of FIBRO standard parts! Use our knowledge and manufacturing competence for your production.

FLEXIBLE STANDARD

The wide product range offers solutions for different requirements and applications:
six sizes: $\varnothing 50$ - $\varnothing 160$ mm
working angles: 50°-85°, 5°steps

OPTIMIZED USAGE OF RESSOURCES

Save time and money within die design, procurement of components and in tool shop by using the standardized cam unit.

HIGHEST QUALITY LEVEL

Decades of know-how and manufacturing competence result in high-level quality.
